TESTIMONIALS

CLAUSTROPHOBIA

"...Simply put, it makes the patient a lot less claustrophobic. Vision can stay on 24/7 and does not interfere with the flow of patients... It speeds up the work flow process because of less claustrophobia. We receive fewer complaints & it makes the department cutting-edge in patient experience and comfort..."

Shaun Kamal - Owner | Affinity Radiology

"...very helpful in using video system in place of sedation medications for pediatric patients. Also very helpful for claustrophobic patients..."

John Dolbinski - Director of Imaging Services | Alaska Native Medical Center

PATIENT CARE

"If you are looking to enhance your MRI patients' experience, this is the product you need! We recently installed this and I am beyond amazed at how vivid and beautiful the videos that dance across our bore really are. Gone are the days of staring at a boring piece of plastic and counting the minutes until you can be finished with the exam. Along with the surround sound headphones, I found the experience to be very calming that completely took my mind off the exam..."

Phyllis Drake - Director of Patient Diagnostics & Ancillary Care | Montgomery County Memorial Hospital

"I love having this for MRI patients. The patients enjoy having the videos as a welcome distraction from being confined in the bore. The videos (my favorite is the more realistic fish aquarium) along with music have calmed many patient's anxiety and nerves. Patients comment on how the videos have helped pass the time..."

Lisa Greenwood - MRI Technologist | Kaiser Permanente

"Lourdes Hospital offers patients a rare opportunity to customize their MRI experience, a feature that sets it apart from other health care facilities in the area. This innovation elevates comfort and relaxation during what can often be an anxiety-inducing procedure...Understanding the apprehension many individuals feel during MRI scans, which can manifest as increased heart rate and blood pressure, or symptoms like nausea and headaches, VISION prioritizes a patient-centric approach. It creates a tranquil setting that promotes comfort and calmness, ultimately enhancing the overall MRI experience..."

Katie Warren - Director of Imaging Services | Lourdes Hospital

OEM PARTNERSHIP

"Over the past year I have had the pleasure of working with the team from UX Platforms and I must say that every interaction instills a greater level of confidence. This confidence extends to the manner in which the UXP team approaches their products and for their professionalism. The UXP team has brought a remarkable level of service not only to my local team in the US, but also to the international group that provides manufacturing support as well. At every step UX Platforms has delivered the requested product with innovation and quality which has created an improved satisfaction and success for my customers. I highly recommend the UX platforms company and value the relationship we have built with their team over the past year..."
